Analysis

The EGX 30 index continued its decline yesterday, closing slightly below 10,600; based on our view, the market should rebound during today's session. The failure to rebound will not be a good sign for the market as the probability of a clear higher low will diminish.

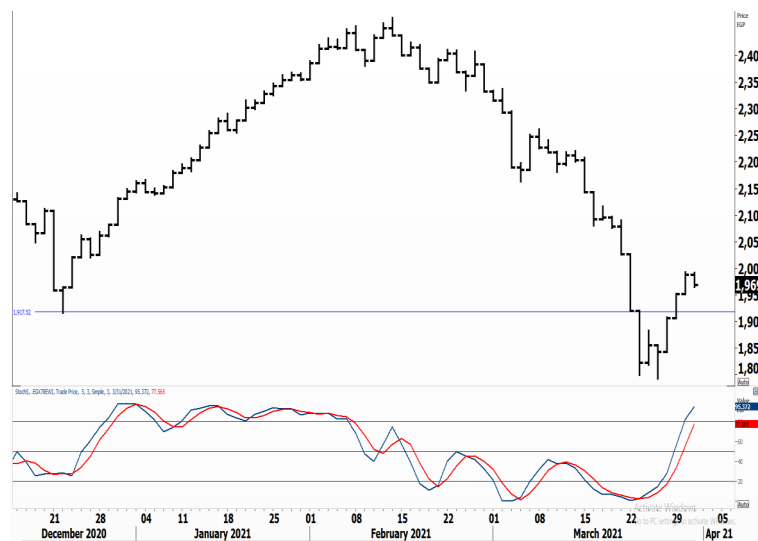

Any rebound from the current area will be considered positive and will probably lead to a rise that can break 10,900 upwards. We should wait, however, for a rebound first.

Egyptian Small Caps Index .EGX 70

Analysis

Despite its high volatility, the EGX 70 index is able to maintain itself better than the EGX 30 index; this is mainly due to the strong decline of COMI and FWRY which possess a high percentage of the EGX 30 weight.

The EGX 70 index is expected to meet support at 1,925; if it rises from above this level, we will step in at a break above 2,000.

Resistance

OFH  Closed at 0.327 after breaking resistance. The stock is on its way to break above 0.34. A break above this level will lead to another significant rise.

HELI  Despite that the stock is an underperformer, it might witness a short-term rise, especially if it confirms the breakout above 4.88. If this breakout is confirmed, HELI will probably reach 5.2.

Support

No stocks broke their support yesterday.

Testing

Support

ARCC  Support lies at 2.75. Position holders can place their stops below this level. If a rebound takes place from here, ARCC might reach 3.25-3.3.

Resistance

EKHO  The 1.17 is the current resistance for the stock. If a breakout above this resistance takes place, we will probably see a strong rise that should take EKHO to 1.25

MNHD  The 3.85 level might serve as resistance. A break above this level will trigger a short-term entry signal with a target around 4.

CERA  Arab Ceramic is one of the high risk stocks as it only suits retail investors who can take high risks. The stock is approaching its resistance that lies at 4.5; next resistance lies at 4.95. We believe that the stock can reach the second resistance.

MNHD  Facing a minor resistance at 3.78. Short-term investors can step in at a break above this level with a target at 3.9-3.95.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 📌 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
