Analysis

The 17,100 is our re-entry level; a break above it will be bullish for the market. For now, the EGX can still test its 16,100-16,200 area unless it rebounds from here and breaks above 17,100.

Investors who will bet on their expectations are recommended to keep their stops strict and respect them if hit. On the other hand, investors who will re-join this rise after confirmation should respect the market if it succeeds to break 17,100 and step in at this breakout as we will then probably break above the 17,500.

EGX Small Caps Index/ EGX 70

Analysis

The 2,850 level is expected to serve as support for the EGX 70; we will probably see a rebound from there.

If, however, we rebound from here, we will then wait for a break above 2,990 or 3,000 to step in.

The EGX 70 looks good and might outperform the EGX 30 in the coming period.

Resistance

JUFO  Broke above 11.85 and closed at 12.15. JUFO looks strong and is expected to hit 14. Stops should be placed below 11.

Support

No stocks broke their support yesterday

Testing

Support

SKPC  Minor support lies at 20.1, followed by 18.5. The ability of the first support to maintain any decline is bullish for SKPC. A break above 21.7 will trigger a new entry.

EFIH  The 16.85 level is currently serving as support for EFIH. We do not recommend stepping in, however, until the stock breaks above 18.

CIRA  Approaching a major support near 9.5. It is a natural scenario to rebound from here as this support is strong. Stops should be placed below 9.4. CIRA is one of the underperformers so it is not on our recommended list.

Resistance

CSAG  If the 26.5 level is broken to the upside, an entry signal will be triggered and our target will be set around 35. CSAG is one of the strong stocks that are expected to continue their rise.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 📌 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
