## Analysis

Our stop was hit on Thursday and confirmed yesterday. As we mentioned in our weekly report, Thursday's panic was significant as it led the market to break support, with a target at 10,400.

The market confirmed this break yesterday as almost all stocks witnessed severe declines. This harsh market fall is taking place while most of the equity markets in our region are witnessing strong rises.

Now, as our stop is hit, we are waiting for the 10,400 to be reached; the second scenario is a break above yesterday's high; this will not trigger an entry signal, but will probably give a chance to investors to sell at higher prices.

Based on the current market situation, the 10,400 level will probably be hit.

## Equal Weights Index/ EGX 50

### Analysis

The EGX 50 index also witnessed a clear lower high and lower low, confirming the downtrend. This decline will probably lead the index to its lows once again.

The market is still weak as any trials to rise end up with a stronger decline.

For now, we will wait on the sidelines until we see a new signal to enter the market.

## Resistance

No stocks broke their resistance yesterday

## Support

- MNHD**  Broke 2.15 to the downside, closing at 2.12. MNHD's target lies around 1.8-1.85. Those who still have positions are recommended to sell rises.
- MTIE**  Violated its minor support that lies at 4 and closed at 3.85. It is important to note, however, that the stock has its major support 3.65.
- UASG**  The break below 1.69-1.7 is of major magnitude. If this breakdown is confirmed, the stock will go to significantly lower levels. Those who have positions are recommended to sell.

# Testing

## Support

- FWRY**  It looks like the stock will break 4.55 to the downside. If a rebound takes place from here, any rise will be seen as a chance to sell any remaining positions. Repurchasing will not take place before the stock breaks clearly above 5.5. Any rise below this level is a selling chance.
- ESRS**  A break below 14 will trigger a sell signal with a minimum target at 13. Position holders are recommended to sell if this support is violated.
- AIH**  If the stock breaks below 0.3 it will witness a strong decline that will probably send it near 0.2.

## Resistance

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

*The area between buying area 1 and buying area 2 is a trading area.*

## Guidelines

**Bullish**

**Bearish**

**Neutral**

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

### **Tips on reading the report**

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 📌 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
