

TECH TO THE POINT

13-Apr- 2023

This report must be read with the disclaimer on the last page

Analysis

The decline yesterday took the market near its support that lies at 16,580; it is important to watch how the market will react today at support as a break below 16,580 will lead to a significant short-term decline.

We are monitoring this level closely but will not take an action based on intraday violations. In other words, we might see a temporary violation which might be followed by a rebound.

EGX Small Caps Index/ EGX 70

Analysis

The EGX 70 index has a minor support at 2,930; a break below this level will trigger short-term stops. On the other hand, we are still waiting for the 3,000 breakout before adding to positions.

The decline of the EGX 70 was not strong, as sellers are still not aggressive; those who are short-term in nature, however, can place their stops below 2,930, our target will be set around 2,800.

Resistance

SUGR Closed at 28.6 after breaking above 27. Our target lies at 33.5, then the stock will probably hit new highs.

One of the stocks that are traded by high-risk traders who know their risk and are able to control their exposure. Broke above 6.25 and closed clearly above it. Our target lies at 7.

Support

No stocks broke their support yesterday

Testing

Support

RMDA

The 2.15 is a support for the stock, followed by 2. We do not recommend stepping in, however. Before a clear breakout above 2.3.

Approached its support that lies at 38 and rebounded to close at 40.4. We expect EKHOA to reach 44 at this rise.

Resistance

The breakout above 6.5-6.75 needs to be clearly confirmed and the prices must close beyond this resistance. We expect this break to take place soon, which will lead DOMT to 8.5.

A break above 9 will trigger a short-term signal with a target at 10. Those who want to step in are not recommended to buy before this minor breakout.

Symbol S. Description

Last Buying Area 1 Buying Area 2 Selling Area 1

Selling Area 2 Selling Area 3 Stop Loss

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓Down" to "← Flat" is considered an upgrade and vice versa.

Buy the full position. Buy:

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face if we consider the stock under study bullish, and a bear face if we consider it bearish. We also added a big bullet if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
