Analysis

This rise is considered as a chance to sell until we see real strength in the market. For now, we need to see the index breaking above 11,000 before taking any action.

Those who are taking the risk and stepping early are recommended to place their stop below the most recent low that lies at 10,400. Our recommendation, however, is to reduce exposure at the current rise and watch how the market will react in this slight rise.

Equal Weights Global Index/ EGX 100

Analysis

The shape of the current rise of the EGX 100 does not look bad.

Let us put it this way; if the EGX 100 rises today, it will confirm a small flag that should lead the index to 2,900; a profitable short-term trading opportunity. Obviously, this strength is coming more from the EGX 70 more than its 30 counterpart.

Resistance

RMDA  Confirmed its breakout above 2.15 and closed at 2.28 yesterday. The stock is expected to reach 2.75-2.8; first minor hurdle, however, lies around 2.5.

MFPC  Closed at 105 after breaking 100 to the upside. MFPC is facing resistance at 110, while its historical high lies around 118. We expect the stock to witness selling pressure as it approaches this area.

Support

No stocks broke their support yesterday

Testing

Support

TMGH  The 8.2 level is the current support for TMGH. We are expecting the stock to rebound from here and reach 9 first. If the latter level is broken upwards, our target will be set around 10.

EFIH  The support that lies at 17 is considered major and not expected to be violated. On the other hand, if EFIH rebounds, it will probably reach 18.75-18.8. We need to see, however, the stock breaking above 17.75 first before stepping in.

Resistance

ISPH  If the 2.65 level is broken to the upside, a short-term entry signal will be triggered with a target around 2.8, followed by 3. We do not recommend, however, stepping in before the breakout.

MENA  Needs to break 0.77 to witness a short-term rise. Our target for MENA lies around 0.85-0.86 which is expected to serve as a significant resistance.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐮 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 📌 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
