## Analysis

It looks like the EGX 30 wants to break to the upside. If we rise today, the breakout will be confirmed and our target will be set around 18,100.

We will alter our stop to be below 17,400, which is Thursday's low; thus, a break below 17,400 will trigger stops. If we break today above 17,700 a significant rise will follow.

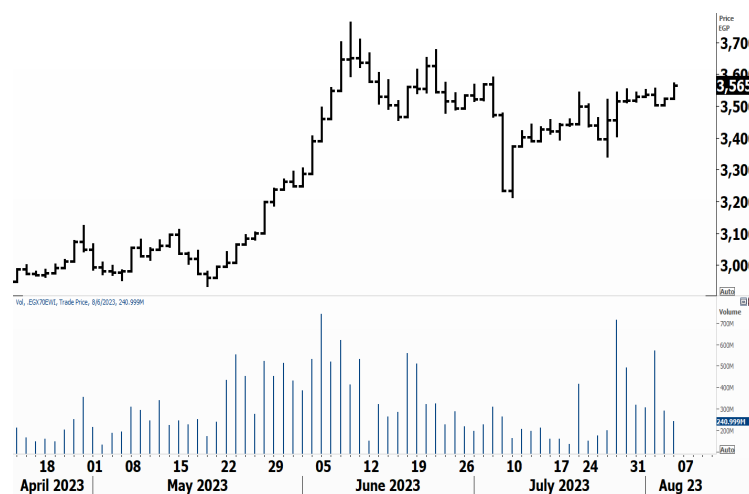

We might see another upward leg in the market in the coming period.

## EGX Small Caps Index/ EGX 70

## Analysis

The EGX 70 index is breaking above its resistance that lies at 3,550; as we mentioned before, a break above this level will trigger a new entry and our target will be set around 3,700.

Those who will enter at these levels can use a nearby stop below 3,500.

### Resistance

**HELI**  Broke the 11.6-11.8 to the upside, closing at 12.12. Our target lies at 13.3 and this is the stock's historical high.

### Support

No stocks broke their support yesterday

## Testing

### Support

### Resistance

**ESRS**  A break above 42 will trigger a new entry signal and our target will be set around 46.5. We expect ESRS to ultimately break its historical high again and reach new highs

**ORHD**  A confirmed break above 11 will trigger a new buy signal with a target at 12. Those who want to buy can enter with a stop below 10.4.

**BTFH**  Buying at the 3.75 is recommended with a target around 4.2. The stop can be placed below 3.45

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

*The area between buying area 1 and buying area 2 is a trading area.*

### **Tips on reading the report**

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🍒 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
