Analysis

Our target lies at 18,200, while the stop is placed below 17,400. Those who are shorter-term in nature can use 17,700 as their stop. We expect intraday declines to stop at 17,700 or above it. On the other hand, if the index reaches 18,200 during this rise, there will be a higher probability of an upward breakout, which will lead the market to new highs.

EGX Small Caps Index/ EGX 70

Analysis

The EGX 70 index confirmed its breakout above its resistance that lies at 3,550; as we mentioned before, a break above this level leads to our target around 3,700.

This is the major peak and we can see some selling pressure from there. We will be monitoring the market closely as it approaches its historical peak.

Resistance

The breakout above 3.75 is significant and should lead to a significant rise. We expect our first resistance to appear near 4.5. A break above this strong resistance will be an early sign of a potential break above 5.5. We like BTFH and are expecting it to reach higher levels.

Closed at 43.5 after breaking above 42 with high volumes. Our target lies at 46.25 which is also the stock's historical high. ESRS is witnessing a major uptrend and is recommended as a buy and hold.

Support

No stocks broke their support yesterday

Testing

Support

Support lies at 19.5; we recommend, however, waiting for the break above 21 before stepping in. If this scenario takes place, a buy signal will be triggered with a target at 22.5

Resistance

A breakout above 27.8 will confirm the major uptrend and will signal a continuation of the stock's rise. ETEL is hitting new highs and is expected to continue its uptrend, one of our buy and hold stocks.

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face if we consider the stock under study bullish, and a bear face if we consider it bearish. We also added a big bullet if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
