Analysis

Yesterday's decline confirmed the minor peak at 10,200, thus increased the importance of its breakout if this break takes place. The 9,800 is our first level to watch, followed by 9,500.

As we mentioned, we can still expect the market to witness another upward leg from the 9,800 or from above. A break below this level will probably lead to some selling pressure. We will not turn back to our bearish view, however, until the 9,500 level is broken to the downside.

Small Caps Index/ EGX 70

Analysis

The EGX 70 index looks ok despite yesterday's selling pressure. If a decline takes place, we will probably rebound from 2,000 or from above. We still expect the EGX 70 index to hit its target at 2,300 even if it declines slightly from here.

Stocks in the EGX 70 index witnessed strong performance lately, and many of these stocks can still witness a renewed upward leg.

Resistance

- EGTS**  Closed at 1.72 after breaking 1.62 to the upside. A confirmation of this breakout today will lead the stock to 2.3-2.35
- UASG**  The stock broke above 0.72 and closed at 0.74 at the end of the session. The 0.83 is our first target, then we will probably see 0.95.

Support

No stocks broke their support yesterday

Support

Resistance

- MPRC**  A break above 5.5 will trigger an entry signal with a target around 6.65. Those who want to step in are recommended to buy at the breakout.
- SKPC**  The 7.73 is a resistance for the stock. A clear break above this minor peak will trigger an entry signal with a target around 8.2. Position holders are recommended to place their stop below 7.25.

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🍒 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
