Analysis

The EGX 30 index closed yesterday at 13,627 and is approaching the 13,700 minor peak. As we know, a break above 13,700 is important before taking an action to enter the market. If the index closes above this level today, we will be eligible to go near the 14,000-14,100 area.

As we have been witnessing lately, the market is trading inside a harsh trading range and is not easy to trade. Thus, we should use clear stops and targets in our trading strategy.

Egyptian Exchange Equal Weights Index EGX50

Analysis

The EGX 50 rebound looks more positive than its 30 counterpart. The MACD is also trying to witness a positive crossover.

If the bullish crossover occurs, along with a breakout above 1,990, a new buy signal will be triggered. Such a breakout will obviously be confirmed by a similar break on the EGX 30.

We will wait for the break, however, before taking any action.

Resistance

CCAP  Broke 2.29 upwards and closed at 2.35 at the end of the session. CCAP should reach 2.6 if it confirms this breakout today.

COMI  The break above 79.4 was confirmed yesterday by an MACD bullish crossover. We mentioned before that the 80.5 level is the stock's gap that should stop the rise. We believe, however, that we can reach 81.75-82 before the next correction occurs.

Support

No stocks broke their support yesterday.

Testing

Support

MFPC  Tested its support that lies at the 58.5-60 range and rebounded to close at 62.25. We believe this support to be significant and are expecting a rebound that can take MFPC to 66 initially.

Resistance

AUTO  Those who want to enter are recommended to wait for a clear breakout above the 3.9-3.95 range. A break above this peak will lead the stock near 4.25.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐮 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
