## Analysis

After the positive divergence that appeared the day before yesterday, which was mentioned in yesterday's report, the EGX 30 rose closing at its high at 11,560.

We explained this positive divergence and expected a rebound that can approach 11,700; our recommendation, however, is to not build positions until a clear break above 11,700 takes place.

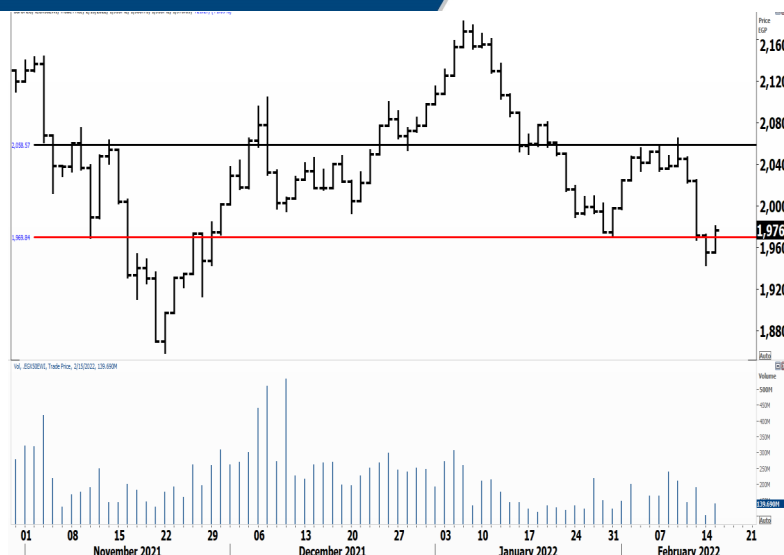

Those who are heavily invested can reduce their exposure at this rise and repurchase at the breakout. We will not turn bullish on the market unless the 12,000 is broken upwards on a weekly basis.

## Egyptian Equal Weights Index .EGX 50

### Analysis

Despite that the EGX 50 rise was not as strong as the EGX 30, we should expect a rebound that can take the index near its high that lies at 2,060.

Those who want to open quick trades can do so with a strict stop. Buying aggressively, however, will be postponed until the EGX 50 breaks above its peak on a confirmed basis.

### Resistance

**TMGH** 

Let us first put things into their proper perspective. The major breakout of TMGH was the 7.8-8 breakout. This major break reversed the major trend to the upside. The target of 12 was expected since the breakout, so everything TMGH does is classical and expected. Thus, the latest breakout above 9.35-9.4 is nothing but a continuation of the stock's uptrend. Our recommendation is the same, buy.

### Support

**HELI** 

Closed at 5.93 after violating its support that lies at 6. Whether this violation will turn out to be false or real, we recommend shifting the funds to another outperformer. We have other opportunities in the market that can lead to profits. TMGH, ETEL, CCAP, and HRHO are some of these stocks that are performing well.

## Testing

### Support

**AMOC** 

Rebounded from its support that lies at 3.6, to close at 3.75 at the end of the session. Our buy signal will only be triggered if the stock breaks above 3.95

**SKPC** 

Closed at 7.44 after rebounding from its support. SKPC might approach 8. Those who want to buy after confirmation can wait for the 8 breakout. Any buying action at these levels should be accompanied with a stop below 7.1.

**EXPA** 

The 8.75 level is the current support for the stock. Any confirmed breakout below this level will be bearish and will lead EXPA to much lower levels. We do not recommend stepping in unless a clear rebound begins to take place.

### Resistance

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

*The area between buying area 1 and buying area 2 is a trading area.*

### Guidelines

**Bullish**

**Bearish**

**Neutral**

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

**Buy:** Buy the full position.

**P.Buy:** Buy portion of a position

**Hold:** Don't Buy or sell.

**P.SELL:** Sell portion of a position.

**Sell:** Sell the full position.

**Stop Loss:** Completely exit the position (or) Re-entry in cases of Selling.

### **Tips on reading the report**

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🍒 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
