Analysis

The EGX 30 closed nicely yesterday at 25,620, forming a new minor bottom at 25,250, which can be used as the first minor trailing stop for short-term traders. Based on yesterday's performance, we should continue our rise and hit new highs, which will have a bullish impact on the overall market.

We expect the Chemical sector to come back, along with real estate too in addition to other stocks that are beginning to witness stronger performance than before like FWRY, CCAP, BINV, and BTFH.

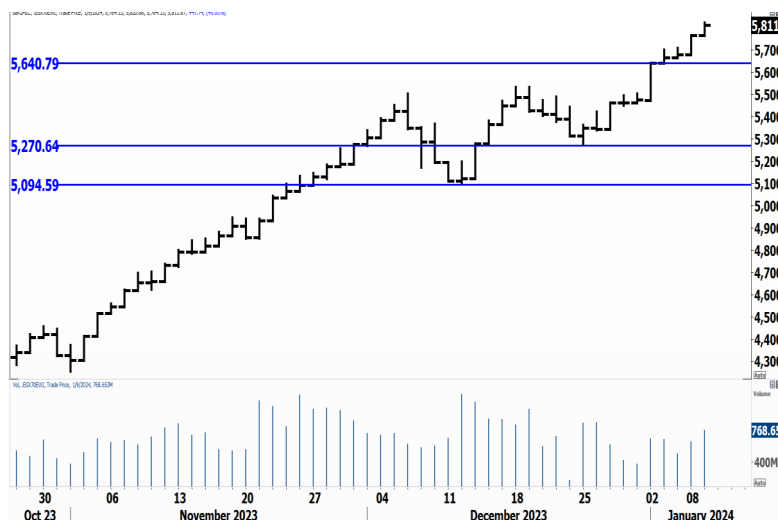

We are still expecting market breadth to improve this time, which means that more stocks will be rising along with the market. This should be considered as good news for investors as there will be a higher probability to produce nice profits in the coming period.

EGX Small Caps Index/ EGX 70

Analysis

The EGX 70 index continued its rise yesterday closing at 5,810.

Our stop is placed below 5,650 and we recommend holding until this stop is violated. We expect that any correction will be slight and short lived as we will be probably witnessing a strong rise to come.

Resistance

- SWDY**  If the breakout above 30 is confirmed today, we will probably see a strong rise that will take SWDY above 32. We are bullish on the stock and are expecting it to continue its major uptrend.
- OIH**  We still need confirmation for the 0.44 breakout. If we break upwards, a strong rise will probably follow, which will lead the stock to 0.52 as our minimum target.
- CANA**  Despite that the stock did not close near its high, it confirmed a breakout above 13.25 with high volumes. Those who want to step in can place their stop below 13.

Support

No stocks broke their support yesterday

Testing

Support

Resistance

- AMOC**  The 10.2 level is the current resistance for the stock. A break above this level will trigger an entry signal with a target at 11.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐮 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 📌 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
