Analysis

Nothing new to say today as the market was not able to break to the upside as expected. We still expect sellers to be more aggressive in the coming few sessions if we do not break to the upside.

If the market declines from here, we will be watching carefully all scenarios and based on how the market will perform near the 16,500 level we will base our recommendation. For no, we are looking for reducing exposure at these levels.

EGX Small Caps Index/ EGX 70

Analysis

The EGX 70 closed at its low as it was not able to sustain early morning gains. As we know, we are already trading near resistance, so a decline from here is normal.

The 3,300 level will be our first level to watch,

Resistance

No stocks broke their resistance yesterday

Support

No stocks broke their support yesterday

Testing

Support

EAST  Current support lies at 18; a break below this level will trigger stops and our target will be set near 15.5. We do not recommend stepping in unless the stock, at least, breaks above 19.

ORWE  Still respecting its support that lies at 14.25. The stock tried to break it the past few sessions but it rebounded to close at 14.63. This minor false break can be a short-term buying opportunity with a target near 15.5 and a stop below 14.

Resistance

DSCW  A confirmed breakout above 0.53 will be an entry signal with a minimum target at 0.58. Short-term investors can enter here with a stop below 0.525

KABO  Buy at the 1.94 breakout with a stop below 1.85 and a target around 2.05.

| Symbol | S. Description | Last | Buying Area 1 | Buying Area 2 | Selling Area 1 | Selling Area 2 | Selling Area 3 | Stop Loss |
|--------|----------------|------|---------------|---------------|----------------|----------------|----------------|-----------|
|--------|----------------|------|---------------|---------------|----------------|----------------|----------------|-----------|

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
