## Analysis

As we mentioned before, a break above 9,000 can lead to a 300 points to the upside. Thus, the 9,200-9,300 is our level to watch. Short-term investors who are stepping in should use pre-determined targets and a clear stop loss. In other words, buying for short-term trades can be done only if you set your target in advance and respect it. Of course, always placing a stop loss.

Our view that a new low below 8,600 will take place is still intact even if the market reaches higher levels. The overall situation is still weak from an intermediate-term perspective and selling pressure will probably step in in the next few sessions.

## Small Caps Index/ EGX 70

### Analysis

The EGX 70 index continued its rise yesterday to close at 1,745. If this rise continues, the index can retest 1,800 which will probably meet significant selling pressure.

If the next decline fails to break the recent bottom, we will begin recommending opening new positions; this is not the case yet, this is why we recommend investors to be conservative when investing in the market.

### Resistance

**HELI** 

Triggered an entry signal after the break of 5.2. Those who want to step in are recommended to use 5.9 as their target and a stop below 5.

**ALCN** 

Closed at 8.02 after breaking above 7.98. Our target lies at 8.5. A breakout above the latter level will lead ALCN to 9.5

### Support

No stocks broke their support yesterday

## Testing

### Support

**CLHO** 

Support lies at 4. A break below this level will lead to a decline that will probably take CLHO to 3.7 which is the major support for the stock.

### Resistance

**CIEB** 

If CIEB breaks above 5.15 it will probably witness a nice rise that can take it to 5.75. Those who want to open short-term positions can enter partially at the 5.15 breakout.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

*The area between buying area 1 and buying area 2 is a trading area.*

## Guidelines

**Bullish**

**Bearish**

**Neutral**

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

**Buy:** Buy the full position.

**P.Buy:** Buy portion of a position

**Hold:** Don't Buy or sell.

**P.SELL:** Sell portion of a position.

**Sell:** Sell the full position.

**Stop Loss:** Completely exit the position (or) Re-entry in cases of Selling.

### Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 📌 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
