Analysis

It looks like the market wants to rise and break to the upside. Yesterday's rise sent positive sentiment among investors as the market closed above 17,700 and is on its way to break its historical peak.

Those who are stepping in here can place their stop below the newly formed bottom that lies at 17,300.

It is worth mentioning that we are probably watching some rotation among stocks; FWRY is one of the stocks that are expected to do a good job in the coming period along with PHDC which is one of the stocks that we generally like.

EGX Small Caps Index/ EGX 70

Analysis

We recommend altering our trailing stop to 3,550; a break below this level will trigger short-term stops with a target near 3,300. We are still keeping our trailing top as it is, especially that the EGX 70 began to rest a little bit.

We are expecting this slight rest to be a narrow sideways that will be followed by a renewed strong rise.

Resistance

FWRY  Now you can buy at this breakout having strong confirmation of a coming significant rise. Our target lies at 6.8; stop below 5.85.

COMI  We still need to see confirmation of the 53 breakout before stepping in. It looks like COMI will begin to outperform once again after a period of underperformance.

MNHD  Closed at 3.8 after breaking above 3.7. Buying is recommended with a minimum target at 4 and a stop below 3.65.

Support

No stocks broke their support yesterday

Testing

Support

Resistance

ETEL  The 28 is an important resistance to watch; investors, however, can look at the 27.6-27.7 as a potential level and a break above it can be considered as an early signal of the 28 breakout.

GBCO  This is AUTO by the way but they changed its ric code. The rise that the stock is currently witnessing is expected to challenge its resistance that lies at 5.7-5.8. A break above this level will trigger a confirmed entry

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🍒 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
