Analysis

The 16,650 is still our stop; this is a level for short-term investors and should be respected if it is violated to the downside. On the other hand, our newly formed minor peak at 17,350 can be used as an early sign to enter if broken upwards. We know that our major resistance currently lies at 17,800; the 17,300 can be used as a preliminary entry signal.

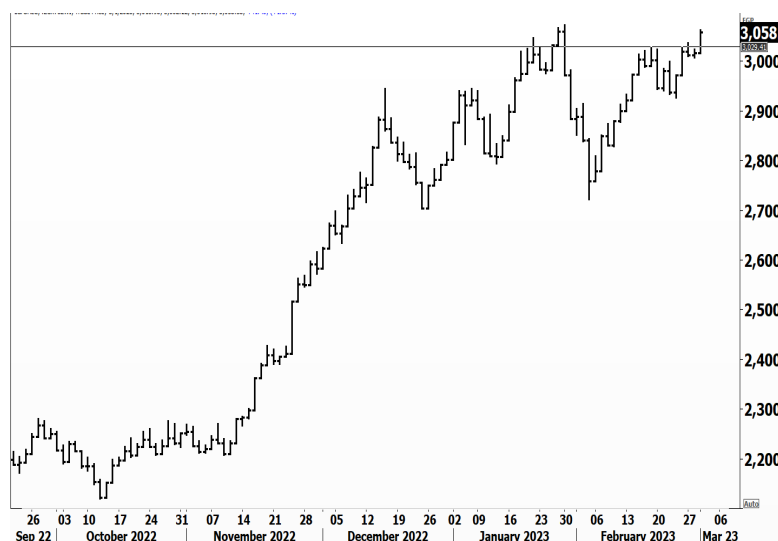

Those who bought recently are recommended to place their stop below 16,650. On the other hand, investors who are not heavily invested in the market are recommended to wait for at least a break of 17,350 before stepping in.

EGX Small Caps Index/ EGX 70

Analysis

The EGX 70 index broke the 3,030 level to the upside and triggered an entry signal in anticipation of a breakout above 3,075. If this breakout takes place, the index will reach new historical highs once again.

Here comes the question; are we going to see a shift in performance now from blue chips back to small stocks?

Resistance

CCAP  Broke 2.25 to the upside and closed at 2.3 with high volumes. Our target lies at 2.45. Buying at this breakout is recommended with the aforementioned target as a minimum one.

ACAMD  Broke above 0.56 with relatively high volumes. The stock witnessed a nice short-term breakout and should reach 0.6 as a minimum target. Please note that the EGX 70 stocks might outperform once again.

ACAMD  The break above 0.53 is of major magnitude and should be watched. If ARAB continues trading above 0.53 today, a major buy signal will be triggered with much higher targets.

Support

FWRY  If the 5.75 violation is confirmed today, a sell signal will be triggered with a target around 5. The stock witnessed lower highs and now breaking the bottom, confirming a short-term down trend.

MTIE  Closed at 4.17 after breaking below 4.28; position holders are recommended to reduce their exposure as the stock might reach the 3.6-3.7 range

Testing

Support

MFPC  Look at the 143 as the stock's current support. This is an important bottom on the short-term. A break below this level will trigger stops.

Resistance

ASCM  Preparing for a strong breakout above 13.3. Our target lies at 16. Buy.

MNHD  Began to do better than before and maintaining itself inside its sideways range. A break above 3.65 will trigger an entry signal with a target around 3.8.

| Symbol | S. Description | Last | Buying Area 1 | Buying Area 2 | Selling Area 1 | Selling Area 2 | Selling Area 3 | Stop Loss |
|--------|----------------|------|---------------|---------------|----------------|----------------|----------------|-----------|
|--------|----------------|------|---------------|---------------|----------------|----------------|----------------|-----------|

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🍒 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
