

TECH TO THE POINT

30-May- 2023

This report must be read with the disclaimer on the last page

Analysis

The EGX 30 closed at 17,200, confirming the breakout above 17,100; the rise came by the end of the session as buying power stepped in aggressively in the last hour.

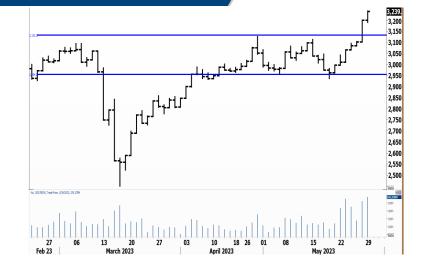

If the index does not fall today, we will probably continue our rise to the 17,700 area where selling pressure will probably appear. The low of the past three sessions at 17,020 can be used as a stop for new entries.

EGX Small Caps Index/ EGX 70

Analysis

The confirmation of the EGX 70 major breakout is bullish for the index. Any decline in the index will be a chance to step in; the 3,150-3,175 range will probably serve as support of a market dip takes place.

Many stocks in the EGX 70 look good, investors are recommended to search for the outperformers.

Resistance

The stock confirmed its major breakout by breaking above 107 and closing clearly above it. Our target lies at 150. Buy and hold is the best strategy.

ACGC One of the major can lead the stock to 6.5. One of the major outperformers in the EGX 70. ACGC's next peak lies at 4.7. This is a major resistance; its breakout will

ACAMD The stock confirmed its breakout and is expected to witness a significant move. Our first target lies at 0.75, followed by 1.

Support

No stocks broke their support yesterday

Testing

Support

Resistance

The 10.75 is a resistance level to watch. A break above it will lead the stock to 11.7. ORHD is already in a major uptrend so we are normally expecting higher targets to be reached.

The stock is trying to witness a significant rise, but we need first to see a breakout above 2.3, which is an important level to watch. Next we have 2.5, then things will be open to much higher levels.

A breakout above 18.9 will lead to a new entry signal with a target at 25-26.

Symbol S. Description

Last Buying Area 1 Buying Area 2 Selling Area 1

Selling Area 2 Selling Area 3 Stop Loss

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

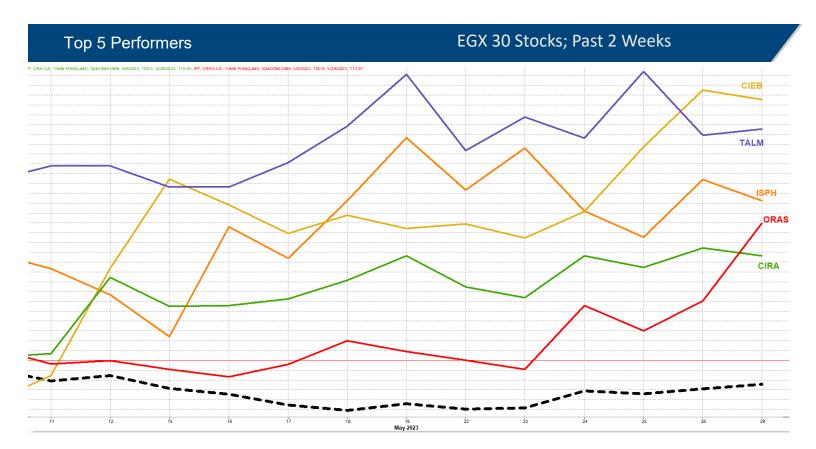

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face if we consider the stock under study bullish, and a bear face if we consider it bearish. We also added a big bullet if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
