YTD	69.70%

## Analysis

The 24,400 level is a minor support that can halt the current correction. If we break below this level, the index will probably approach 23,600, which is a more important support to watch. Our major support lies at 22,200, however, we will place our stop either below 23,600, or below 24,400 for very short-term investors.

The overall view is still bullish and we are still expecting new highs to be hit regardless if this correction is short-lived or not. We are more biased to a short-lived correction that can end near current levels

## EGX Small Caps Index/ EGX 70

### Analysis

The EGX 70 rose yesterday and closed at its high, creating a minor support at 4,850, which can be used for very short-term investors.

We expect the rise to continue and we might see a continuation of the current small caps rise.

If the EGX 70 does not break 4,850 today, we will probably see new highs.

## Resistance

**DOMT** 

Broke above 10, surpassed 11 during the session but closed at 10.32. If DOMT continues trading above 10 today, a buy signal will be triggered with a target around 13

**AIH** 

The stock broke above 0.38 sharply and even broke above 0.44 closing at 0.445. We recommend buying dips as our target lies at 0.65.

## Support

No stocks broke their support yesterday

## Testing

### Support

**TAQA** 

The 10.3-10.5 range is expected to serve as support. Those who want to step in can buy partially with a stop below 10.3.

### Resistance

**OLFI** 

A break above 10.15 will trigger a new entry signal and our target will be set around 12. The stock looks strong and expected to witness a significant move.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

*The area between buying area 1 and buying area 2 is a trading area.*

### Guidelines

**Bullish**

**Bearish**

**Neutral**

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

**Buy:** Buy the full position.

**P.Buy:** Buy portion of a position

**Hold:** Don't Buy or sell.

**P.SELL:** Sell portion of a position.

**Sell:** Sell the full position.

**Stop Loss:** Completely exit the position (or) Re-entry in cases of Selling.

### **Tips on reading the report**

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐮 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🍒 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
