## Analysis

The market continued its decline yesterday, and despite the last half-hour rebound, this decline can continue to the 9,600 as the first support to watch. As we know, in case of a sudden rise, our re-entry will be triggered at a break above 10,000, which is the upper boundary of this lateral range.

A break below 9,600 will have bearish implications on the short-term.

## Small Caps Index/ EGX 70

### Analysis

The 2,100 is now the support to watch, as a break below it will lead to a renewed decline.

We can see a rebound from the 2,100; such a rebound will probably be short-lived as the overall situation does not look positive. However, if we break this support downwards, stops will be clearly hit.

## Resistance

No stocks broke their resistance yesterday

## Support

- FWRY**  The stock violated its support that lies at 3.5 and closed clearly below it triggering a confirmed breakdown. This support break will have bearish implications on the short-term and lower targets will probably be seen.
- HELI**  Closed at 5.4 after breaking 5.5 downwards. If this break is confirmed today, the stock will probably reach 4.8.
- ESRS**  The 13.3 breakdown will probably be confirmed today. Our target lies at 12.25. It is important to note that if the stock confirms this break, it will be bearish on the short-term as the trend will be down.
- MTIE**  Closed slightly below 3 but still needs confirmation today. If MTIE trades below 3 today, a sell signal will be triggered and our target will be set around 2.5.

## Testing

### Support

- SWDY**  Witnessed a strong decline yesterday, closing at 7. If SWDY breaks below 7, a sell signal will be triggered with a target near 6.
- ORWE**  Expected to find support at 6.45. We do not recommend, however, stepping in before a clear break above 6.8.
- DSCW**  If the 0.328 level is broken downwards, an exit signal will be triggered. If this scenario takes place, the stock will probably reach 0.28.

## Resistance

| Symbol | S. Description | Last | Buying Area 1 | Buying Area 2 | Selling Area 1 | Selling Area 2 | Selling Area 3 | Stop Loss |
|--------|----------------|------|---------------|---------------|----------------|----------------|----------------|-----------|
|--------|----------------|------|---------------|---------------|----------------|----------------|----------------|-----------|

*N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators*

*The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.*

*The area between buying area 1 and buying area 2 is a trading area.*

### Yesterday's T+0/T+1 Trades

| Symbol | Hit first Target | Hit Second Target | Hit Third Target | Hit Stop Loss | Triggered Buy | No Action |

## Guidelines

**Bullish**

**Bearish**

**Neutral**

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

### **Tips on reading the report**

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🍒 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
