TECH TO THE POINT

15-Oct-19

This report must be read with the disclaimer
on the last page

Resistance

EFIC  Closed at 11.76 after breaking its resistance. We believe that EFIC can go near the 14-15 range. If a decline occurs, the 11 level will probably serve as support.

Support

ACGC  Despite that the stock broke a minor support, we expect the 1.67-1.7 area to serve as a stronger support. Those who want to step in are recommended to make sure that the next support will halt the stock's decline.

Testing

Support

SWDY  First support lies at 12.6. A break below this level will probably lead the stock near 12. We will wait for a rebound from 12.6 before stepping in.

Resistance

SKPC  Those who want to step in are recommended to wait for a clear break above 9.5 first. If this breakout occurs, a buy signal will be triggered with a target near 11.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
