TECH TO THE POINT

17–Oct- 2023

This report must be read with the disclaimer
on the last page

Resistance

CIEB  Closed at 16.61 after it broke 16 to the upside. The stock hit new historical highs and expected to continue its rise; our trailing stop will be placed below 15.5.

EKHOA  Still rising and reaching new highs; EKHOA is one of the strong performers and still expected to continue its major up-trend. Buying dips with a stop below 45 is recommended.

HDBK  Broke 26.7 to the upside and closed at 27.5. HDBK also is hitting new historical highs and not expected to witness a strong correction in the time being. One of the buy and hold stocks.

Support

No stocks broke their support yesterday

Testing

Support

Resistance

SWDY  If it breaks above 25.5, a buy signal will be triggered. We recommend investors to step in at the breakout with a stop below the low of the breakout day.

FWRY  A break above 4.6 will trigger a short-term entry signal with a target at 5.1. FWRY is one of the bad performers in the market but might witness a rise along with the other stocks.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐮 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
