

TECH TO THE POINT

18-Oct- 2023

This report must be read with the disclaimer on the last page

Analysis

After yesterday's rise, we will alter our stop to be below 21,000, which is the low of yesterday's session. Thus, we will hold our positions, and look at the 21,000 level; if not violated, we will not recommend taking profits.

As we mentioned before, markets that hit new highs should not be treated with targets; it is much better to buy and hold and use trailing stops.

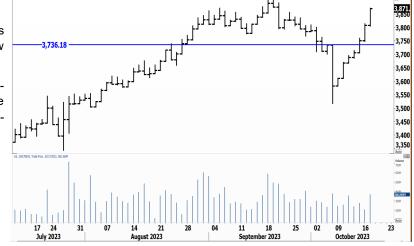

Outperformers are still the same and expected to continue their strong performance. Stocks that hit new highs yesterday are SWDY, TMGH, and ORWE.

EGX Small Caps Index/ EGX 70

Analysis

The EGX 70 broke above 3,850 and closed above it. This break is a sign of a potential above the major peak; thus new highs are expected to be seen soon.

We are bullish on small caps and are expecting this rise to continue. There are many stocks that look good in the index; we like for example EGCH, KZPC, SUGR, LCSW, MICH, in addition to other stocks.

Resistance

SWDY ~

Broke above 26 and hit new historical highs; SWDY is a buy and hold and we will not use targets anymore. Now it is the time for just trailing stops, while holding positions.

Also hit new historical highs after it broke its IPO price upwards and hit new historical highs. First stop can be placed below 13.5. We recommend buying dips and holding.

The break above 4.6 triggered a short-term entry signal with a target at 5.4-5.5. We recommend stepping in with the aforementioned target.

Support

No stocks broke their support yesterday

Testing

Support

Resistance

A break above 9.9 will trigger a new entry signal and our target will be set at 10.7. Volumes were high in the past two sessions, thus, we expect this breakout to take place soon.

The 9.5-9.75 is a major resistance area for the stock. A break above this level will trigger an entry signal and new highs will be hit.

Symbol S. Description Last Buying Area 1 Buying Area 2 Selling Area 1

Selling Area 2 Selling Area 3 Stop Loss

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

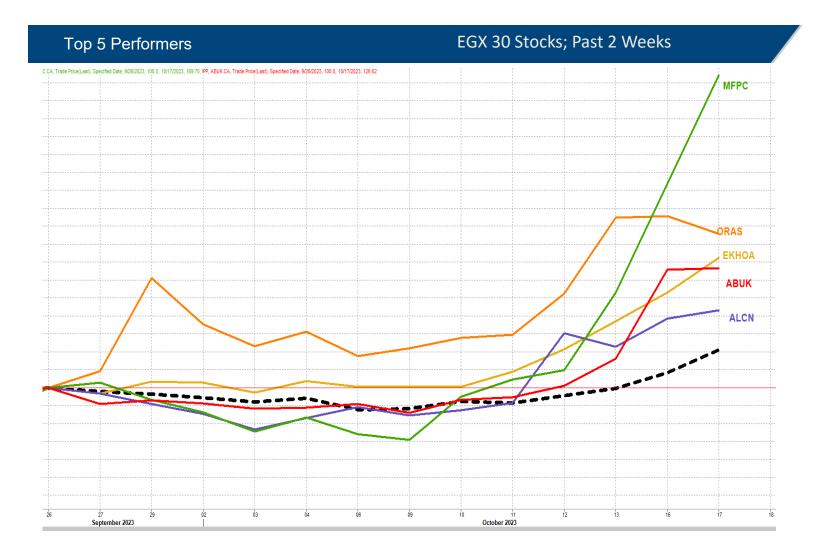

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face if we consider the stock under study bullish, and a bear face if we consider it bearish. We also added a big bullet if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
