1 YEAR	4.36%
YTD	9.23%

## Analysis

The EGX 30 index closed yesterday at 14,239 and is still stuck inside its sideways range. As we know, we are waiting for a break above 14,500 before re-entering the market. On the other hand, the 14,150 will be set as our stop. We are still expecting a breakout above 14,500 despite the current market inability to rise significantly.

The MACD indicator is showing a potentially positive scenario; if a rebound occurs from here along with a rise on the MACD, we will probably break 14,500 upwards.

## Egyptian Exchange Equals Weights Index EGX50

## Analysis

The EGX 50 index closed unchanged, still moving near its resistance that lies at 2,080; as we mentioned before, a break above this level will trigger an entry signal with an initial target at 2,200; we expect an ultimate breakout above 2,200.

The MACD indicator is still in its buy mode, which increases the probability of a break above resistance.

## Resistance

Broke 2.48 upwards to close at 2.53 at the end of the session. The breakout came on high volumes, which makes it a confirmed signal. Our target lies around 2.8.

Closed at 10 after breaking 9.8 upwards. If the stock continues trading above 9.8 today this breakout will be confirmed and our target will be set around 11.5.

## Support

No stocks broke their support yesterday

## Testing

### Support

### Resistance

We recommend investors to wait first for a clear break above 4.6-4.65 before stepping in. A breakout above this level will trigger a buy signal and our target will be set around 5.5.

## Guidelines

**Bullish**

**Bearish**

**Neutral**

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction.  
E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

### Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐂 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 🟩 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
