Analysis

The EGX 30 broke its resistance to the upside and closed near 10,500, and should be heading towards the 11,000 if this breaks confirmed today.

We were not expecting this break today, especially that the 10,300-10,400 was a significant resistance. We opened short-term positions with clear targets and stop losses, and we recommend those who are entering to be short-term oriented, as we are still risking a renewed decline. This is why our trades are all short-term until the intermediate-term picture becomes clearer.

Small Caps Index/ EGX 70

Analysis

The EGX 70 is currently underperforming the EGX 30 as the rise is mainly on blue chips. We believe, however, that the 2,100 should serve as support and a rise can occur from a level above this support.

Thus, our stop will be placed below 2,100 as a break below it will lead to a stronger decline.

Resistance

Support

No stocks broke their support yesterday

Testing

Support

SKPC  Rebounded from its support that lies at 7.6 and closed at 7.85. We do not recommend buying however, until the 8 resistance is broken to the upside

Resistance

CIEB  A break above 6.7 will trigger an entry signal and our target will be set at 8. We recommend buying at this breakout.

ORHD  The 6.2 is the current resistance for the stock. A break above this level will trigger a buy signal with a target at 7.5. Those who are out of the stock are recommended to buy at the breakout.

MNHD  We can use the 2.7 break as a buy or the 2.8. Those who want to step in early can open a short-term position at the 2.7. The stock can retest 3.1-3.2.

ORWE  If the stock breaks above 7.12 it can reach 7.4-7.5, which is the resistance for ORWE. We recommend, however, to enter at the 7.5 breakout for more confirmation.

Symbol	S. Description	Last	Buying Area 1	Buying Area 2	Selling Area 1	Selling Area 2	Selling Area 3	Stop Loss
--------	----------------	------	---------------	---------------	----------------	----------------	----------------	-----------

N.B. please note that the levels are too close as these trading opportunities only suit T+0 speculators

The prices that are accompanied by a green arrow in the above table show resistance levels. Thus, a break above these levels will pave the way to achieve one (or all) of the targets.

The area between buying area 1 and buying area 2 is a trading area.

Guidelines

Bullish

Bearish

Neutral

Trend: (Upgrade, Downgrade): Change in trend color refers to upgrade or downgrade in the trend relative to the previous trend direction. E.g. change from "↓ Down" to "↔ Flat" is considered an upgrade and vice versa.

Buy: Buy the full position.

P.Buy: Buy portion of a position

Hold: Don't Buy or sell.

P.SELL: Sell portion of a position.

Sell: Sell the full position.

Stop Loss: Completely exit the position (or) Re-entry in cases of Selling.

Tips on reading the report

The first page includes an analysis of two major indices in the Egyptian Stock Market; the norm is that we will analyze both the EGX 30 and 70, but sometimes we will compare the EGX 30 to its 50 counterpart if there is important information in this comparison. We also use the Hermes Last Index interchangeably with the EGX 30. The .HRMSL index has an important edge; it uses last prices instead of VWAP. First thing our clients should do is to read the indices analysis carefully to have a clear understanding on our overall view.

The second page includes stocks that broke out beyond their resistance levels, and those that violated their support levels. It also includes stocks that are testing their support levels and those that are testing their resistance. This analysis is important and it is the core of our recommendations. It is important to note though that not all stocks that are testing their support levels are bullish, and not all that are testing their resistance levels are bearish. To make it easier for our clients, we have placed a bull face 🐮 if we consider the stock under study bullish, and a bear face 🐻 if we consider it bearish. We also added a big bullet 📌 if we are neutral.

It is important to note that you might find a stock that we consider bullish in our analysis (in the breakouts/testing section) but it remains as a hold or partial sell in the table. The conflict here is that the table is more conservative. This will not be an issue with our clients, because our analysis will explain why we are being bullish/bearish on the stock.
